Connection in the Middle

Depending on the stable layout and length, the supply unit can be attached in the middle or at the side.

Connection at the Side

Water Distribution

The deflector allows us to get an optimal water distribution across all Pads.

Deflector Profile

The deflector profile features an optimized shape for best-possible "dripping" results.

Easy Control

Water quantity and distribution can be adjusted by infinitely turning to the deflector.

Cleaning Cycle

Via the extra $\frac{3}{4}$ inch connector the cleaning cycle can be controlled absolutely independently.

Supply Unit

Complete with piping accessory as well as console and pump.

Main part of the Pad-Climate-System

The centrifugal pump and the central water storage element are a unit and can be installed as such.

Water Storage

The water channel and the storage contains all the water the system needs. No outside water tank is required.

Lids for the Water Storage

Perfect water returns to the newly designed Pad lids. The lids also prevent mice and rats intruding the system.

Pad Guidance

The Pad guidance of the individual Pads are held firmly within the system.

Clip-on Function

All profiles can be easily attached to the pipe holder. Easy assembly and disassembly.

Plastic filters

Material: PP (polypropylene) UV stabilized

Color: Black

Standard dimensions:

Depth: 150mm

Length: 600mm

Height: 1.800mm / 2.000mm / 2.250mm

Prices for complete set, including PP plastic filter package 150mm

Delivered on site (NL) - Excluding assembly and PVC glue - Excluding 21% VAT

<i>Filter height</i>	<i>Total height</i>	<i>Length</i>	<i>Price (1~ 230v)</i>
